

Over 253 years of combined experience make Power Pipe and Tank one of the largest and most successful fiberglass fabricators in the United States.

For 50 years, Power Pipe and Tank has been a pioneer in the fiberglass tank industry manufacturing quality, innovative fiberglass tanks in accordance with a variety of commercial and military specifications. By using both hand-lay-up (ASTM D 4097) and filament winding (ASTM D 3299) methods, Power Pipe and Tank has the production system in place to manufacture a consistently uniform, quality, extra strong fiberglass tank for any industry. Each tank is custom engineered and designed for its particular application.

A professional engineering staff, AutoCAD workstations, automated processing equipment and a complex quality control system assure our ability to meet the demands of each and every customer.

Our management team have extensive knowledge, broad experience and a thorough understanding of our customer's process and business drivers. Power Pipe and Tank gives individual attention to each customer's job and produces a finished product that will be a source of pride for the end user.

We believe our clients are entitled to expect not only quality, but also competitively priced products delivered on time. And although Power Pipe and Tank is small enough in size to effectively give each and every customer the individual attention they deserve, it's also large enough to handle mass production.

Fiberglass Tanks are the ideal solution for all your various farm, ranch, and agricultural storage needs.

Farm & ranch stock tanks are lightweight, corrosion resistant and virtually maintenance free. Our tanks are preferred by farmers and ranchers alike, for use as feed or water stock tanks. They are structurally engineered to

last and can be customized, based on your specifications. The Varmint Ramp is a feature that allows animals a way to escape. These ramps can also be installed in steel tanks.

- Heavy duty fiberglass construction
- Light and easy to relocate
- Useful life of over 20 years

- Will never rust or corrode
- Tapered wall to alleviate cracking due to ice
- Anti-skid, non-slip bottom for cattle safety
- Float box products available for constant water level
